Welcome to Enbridge Gaz - Enbridge Gaz Québec

According to our terms of service, the contract between you and Enbridge Gaz Québec comes into effect once your natural gas service application is approved. Even though the contract is not in writing, it remains in effect until it is terminated by the customer or Enbridge Gaz Québec.

Manage your consumption and your bills from your Customer Portal!

Did you know?

You can spread the total cost of your annual natural gas consumption across 12 monthly bills. Your monthly payments are reviewd twice a year, in March/April and in September, to align with your consumption and the price of natural gas. Are you interested ?

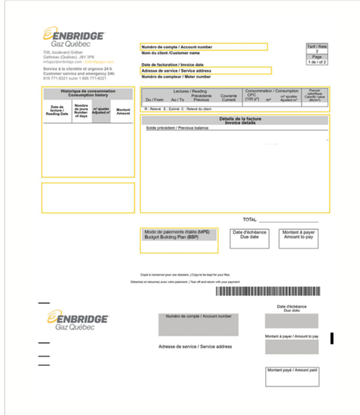
All it takes is a few clicks : it's simple and quick!

My Bill - Enbridge Gaz Québec

Your Customer Portal, accessible through www.enbridgegaz.com , lets you check your bill, your transaction history, your current charges and your payment arrangements!

Do you have questions about your bill?

Account number, consumption history and determination, status of your account... understand your bill at a glance using our example :



Enbridge Gaz Québec proposes different payment methods. Choose the one that best suits you!

- Pay your bill online through your banking institution.
- Sign up for the automatic withdrawals program: it's simple and quick! Recommended.

Adhere to gas from renewable sources

Since 2020, we have been offering our customers the option of contributing to a better environment by opting into the RSG rate. Customers who voluntarily agree to have part of their consumption billed at the RSG rate encourage the RSG program and help reduce GHG and methane emissions.

A few tips and tricks

to optimize your consumption

1. Be in control with a smart thermostat. As your ally in your energy saving efforts, it adapts to yours habits preferences. You can control it remotely through you smartphone, as it responds to the temperature fluctuations in your home and integrates your routine. If you are eligible, when your purchase and install a smart thermostat, you will receive $100.
2. Make the most of natural light: open your curtains on sunny days.
3. Change your furnace filter! A clean filter helps deliver optimal performance. Change it every three months to maintain your system.
4. Set your ceiling fan direction clockwise in winter to run your heating efficiently, and counter-clockwise in the summer to pull the hot air up. A simple trick to improve air circulation!
5. Keep furnace intake and exhaust pipes clear of obstructions (*if you have a forced air system).

As a rule, well-maintained appliances enable you to optimize your consumption! You'll find all our tips at :

Tips and tricks to consume better - Enbridge Gaz Québec

Did you know?

Enbridge Gaz Québec offers you the chance to obtain cash incentive when you purchase and install an energy efficiency appliance!

Some examples:

As a residential customer, you may be eligible for $400 when you install an air exchanger with heat recovery, $500 for a condensing tankless water heater or $850 for a high efficiency combined heating system (conditions apply).

Certain conditions apply.

CASH INCENTIVES - ENBRIDGE GAZ QUÉBEC

Are you thinking about getting a water heater?

The advantage of a tankless water heater is that it heats more water, on demand, and has a much longer lifespan than a conventional water heater.

Opt for a thankless water heater starting at $31.99/month, for 180 months, and you could qualify for the cash incentive program.

$500 cash incentive

Enbridge Gaz Québec offers a $500 cash incentive or a discount on monthly rental fees when you acquire and install a tankless water heater. This program is for residential customers replacing a natural gas fueled standard water heater that is more than 10 years old.

...or opt for location

Opt for a standard water heater starting at $15.29/month and tankless starting at $31.99/month, for a 120-month lease for a standard or force-vented water heater and 180 months for a tankless water heater, eligible for the cash incentive program.

Opt for a rental furnace, starting at $46.95/month, for 180 months. You have a choice between a 60,000 – 80,000 – 100,000 or 120, 000 BTU unit.

$850 cash incentive

High efficiency combined systems combine a tankless water heater and a fan-coil unit for superior energy efficiency and CSA P9 certification. This financial assitance is for residential customers (new and existing) submitted at Rate 2. Pre-admission must be obtained before starting the work.

High Efficiency Combined Heating System – Enbridge Gaz Québec

You own your heating system and are subscribed to the plan Privilège, these are your perks :

- covers labor and most defective part replacement costs
- includes cleaning (every two years) of your equipment

The Plan Protégé does not allow you to benefit from cleaning. To upgrade to the Privilege Plan, call us at 1-819-771-8321 .

Did you know?

Your meter must at all times be visible, and must never be covered by a tarp or any sort of structure. In the interest of safety, clear away any snow buildup.

If your meter is covered in ice, contact our Customer Portal as soon as possible.

Safety is everyone's business, and a priority at Enbridge Gaz Québec

To ensure your safety and that of your family, have your equipment maintained by a certified natural gas professional. Have your air ducts and gas exhaust checked at the same time.

Keep the area around your combustion equipment clean. Do not obstruct the display, air intake or exhaust.

Enbridge Gaz Québec encourages its customers to check the batteries for their alarms when setting the clock back or forward!

Safety and Prevention - Enbridge Gaz Québec

Are you going to be away for a while?

If you're going to be away for a short while (less than two weeks), Enbridge Gaz Québec recommends you lower the thermostat setting by 2 or 3 degrees.

Several appliances can be adapted while you're away to optimize your heating or air conditioning. That's the case, for instance, with standard natural gas water heater (connected to a chimney), which can be set a "vacation" mode. Power vent water heaters can simply be disconnected while you are away, and for additional safety, shut off the cold water supply to limit the risk of damage from leakage. For electric water heaters, switch off the power supply as well as the cold water supply. Save energy!

A Few Suggestions Before You Go On Vacation
